Re: Swift Creek Project  
Nash County, North Carolina  
Notification for CCB Structural Fill Facility

Dear Mr. Hocutt:

As we have discussed previously, ReUse Technology, Inc. plans to make a small expansion to our Swift Creek project. The Division of Solid Waste Management approved the original project by letter dated December 3, 1991. We are now nearing completion of that part of the project. ReUse has purchased the property to the immediate south of the original project and therefore we plan to complete the overall project by filling the new property.

③

In accordance with Rule .1703 of 15A NCAC 13B, we are submitting notice of the construction a coal combustion byproduct structural fill facility. The details of the project as required by this Rule are as follows:

**.1703 (a) (1)**

Coal combustion byproducts will be used as structural fill for the construction of industrial and/or commercial buildings. The facility is located in Nash County just north of Swift Creek along US Highway 301. The enclosed 8-1/2 inch by 11 inch topographic map is marked to show the project location. This topographic map comes from the Whitakers, North Carolina 7-1/2 minute United States Geological Survey map.

**.1703 (a) (2)**

The estimated start date is January 11, 2002. The estimated completion date is June 1, 2002. This will complete all activities including the project covered by the 1991 approval and this expansion.

Mr. William R. Hocutt  
December 11, 2001  
Page 2

**.1703 (a) (3)**

Approximately 4,000 cubic yards of coal combustion byproducts will be utilized in the portion of project covered by this notification.

**.1703 (a) (4)**

Coal combustion byproducts will be utilized from the Cogentrix facility located in Battleboro, NC. The enclosed TCLP analytical results are representative of all coal combustion byproducts to be used in this project.

**.1703 (a) (5)**

The property owner's statement of consent is attached. Please note that since the project crosses a former property line, deed recordation will reflect the combination of the entire property into a single deed.

**.1703 (a) (6)**

The coal combustion byproduct generator is as follows:

Cogentrix of Rocky Mount, Inc.  
P.O. Box 370  
Route 2  
State Road 1400  
Battleboro, North Carolina 27809  
Contact: Mark Casper  
Phone: (704) 525-3800

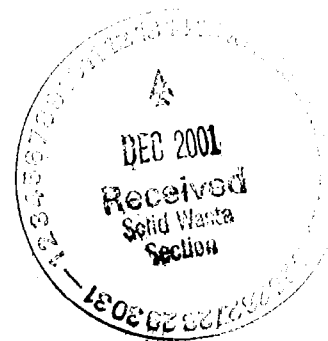

**.1703 (b)**

Although this portion of the project covered by this notification will have less than 10,000 cubic yards of coal combustion byproducts, we are providing construction plans signed by a registered professional engineer. This is done to clearly identify the limits of the overall project covered by the 1991 approval and those covered by this notification.

This completes the information submittal requirements of 15A NCAC 13B.1703. However, other information, which has upon occasion been requested by the Solid Waste Section, is available. The following information is provided in addition to the requirements of the regulations:

1. The project's Sedimentation and Erosion Control Plan has been reviewed and approved by the Division of Land Resources. A copy of the approval letter is enclosed.

Mr. William R. Hocutt

2. The wetlands boundaries have been delineated and staked. The U.S. Army Corps of Engineers has reviewed and approved the delineation. A copy of their Jurisdictional Determination is enclosed. Based on Corps approved staking of the wetlands, a wetlands map has been prepared and submitted to the Corps for final approval. The wetlands are clearly identified. No coal combustion byproducts will be placed within 50 horizontal feet of any wetland boundary.
3. Sherrill Environmental, Inc has performed a groundwater elevation study. A copy of the report is enclosed.

If there are any questions concerning this notice, please call Bob Waldrop at (770) 517-7017.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Waldrop', with a stylized flourish at the end.

Robert J. Waldrop
